Best China Equities Manager

David Choa, Head of Greater China Equities

Through deep China expertise and disciplined investing, the team has consistently translated alpha generation into strong long-term client outcomes.

Under David Choa's leadership, BNPP AM's Greater China Equities team has established itself as a leading China equities manager, combining deep local expertise, disciplined bottom-up stock selection and a clear focus on China's long-term structural growth themes: innovation, industrial upgrading, lifestyle change and consolidation. Backed by BNPP AM's global research, sustainability and investment resources, as well as close collaboration with our China JV's onshore equity research team, the team brings together international perspective and local market insight to navigate China's complex and fast-evolving equity landscape.

Managing approximately USD 2.2 billion across four China and Greater China strategies, the team has delivered resilient long-term performance through challenging market cycles.

This recognises not only the team's proven investment capability, but also its enduring commitment to China, its client-centric innovation and its ability to deliver differentiated outcomes in one of the world's most dynamic equity markets.
