## Mirova

(an affiliate of Natixis Investment Managers)

### Best Impact Investment Initiative

The strategy aims to deliver a tangible impact across climate resilience, social equity and responsible technology.

**M**irova, an affiliate of Natixis Investment Managers, is a pioneer in sustainable finance, dedicated to directing capital towards investments that are not only sustainable but also create real, long-term value.

Mirova's Global Sustainable Equity Strategy aims to deliver a tangible impact across climate resilience, social equity, and responsible technology.

At the core of the strategy is a robust, data-driven ESG and impact assessment framework that evaluates companies throughout their entire value chain. This allows the managers to prioritise businesses that contribute to the UN Sustainable Development Goals. For example, 55% of portfolio companies directly support sustainable solutions, such as climate mitigation, healthcare access and circularity.

Mirova has significantly increased its engagement activities, with a 70% rise from 2024 to 2025. These efforts have yielded tangible results, including better emissions disclosures, improved supply-chain practices and stronger governance over emerging technologies like AI.

Mirova recognises that many sustainability challenges require collective action. Environmental impact is maximised by contributing to global and sector-wide initiatives, including Climate Action 100, IIGCC, NZAM and Ceres.

Through the Taskforce for Inequalities and Social-related Financial Disclosures and 30% Club France, Mirova advanced standards for DEI, living wages, and social-impact transparency.

Through coalitions on ethical AI and responsible mining, Mirova supported emerging governance norms shaping the future of sustainable technology.

Collectively, these achievements reflect a stewardship strategy that goes beyond compliance to create real-world, lasting benefits. Mirova client's investments are actively contributing to a more resilient, equitable, and sustainable economy. Through rigorous analysis, proactive engagement, and influential advocacy, the firm is driving positive change at company, industry, and policy levels.

As investors place greater scrutiny on impact, Mirova's 2025 achievements show a model of stewardship that is transparent, ambitious and effective and one that is already helping companies, industries and communities advance toward a more sustainable future.
